

“the force of unity”.

The new ONE WORLD collection is a reflection of today’s multicultural society, conceived to celebrate both unity and individuality at the same time for brands that want to identify with the diversity of their multicultural audience. A message of diversity and harmony with a contemporary touch. The collection was developed in Window France’s unique DNA FACTORY, scanning real life models to capture their individual attitude and presence.

The collection is called FACETS because of the angular faceted skin surface that makes each of these esthetic pieces a work of art.
